

Statement of Mr. Hidenobu Sobashima, Ambassador of Japan
to the Republic of Zambia at the Groundbreaking Ceremony at Kanyama
First Level Hospital, of the Project for Upgrading Lusaka Health Centres to
District Hospitals Phase 2 on Thursday 7 June 2018

The Hon. Dr. Chitalu Chilufya, Minister of Health of the Republic of Zambia,
The Hon. Lawrence Sichalwe, Minister of Chiefs and Traditional Affairs,
Ms. Elizabeth Phiri, Area Member of the Parliament,
Dr. Hitoshi Fujiie, Deputy Chief Representative, JICA Zambia Office,
Mr. Kazuyuki Inoue, President and Representative Director, Shimuzu
Corporation,
The Representative of the Kanjombe Family,
Senior Government Officials,
Representatives from the Media,
Distinguished Guests,
Ladies and Gentlemen,

It is my honour and pleasure to represent the Government of Japan at this
Groundbreaking Ceremony here at Kanyama First Level Hospital, of the
Project for Upgrading Lusaka Health Centres to District Hospitals Phase 2.

TICAD VI, that is the 6th Tokyo International Conference on African
Development, held in Nairobi, Kenya in August 2016, attached importance to
promoting resilient health systems for quality of life, to achieve universal
health coverage, and create “Resilient Africa”, among other priority issues.

The Project for Upgrading Lusaka Health Centres to District Hospitals
Phase 1, resulted in the commissioning by His Excellency Mr. Edgar Chagwa
Lungu, President of the Republic of Zambia, of Chilenje and Matero First
Level Hospitals in April last year.

The second phase of this Project covered the Health Centres here in
Kanyama, as well as Chawama and Chipata in Lusaka District for
upgrading to the First Level Hospitals, by constructing the buildings
including an outpatient department and an inpatient department and
providing the necessary medical equipment at each of the three Health
Centres.

For this purpose the Government of Japan decided to provide a grant up to 3 billion 908 million Japanese Yen, or around 400 million Kwacha.

Already as a result of the Phase 1 cooperation, the numbers of referral to the University Teaching Hospital (UTH), that is the Third Level Hospital, have decreased significantly, since Chilenje and Matero Hospitals are now able to conduct Caesarean operations, among other operations.

As this Phase 2 Project will further increase the number of people in Lusaka who have access to basic health services at hospitals close to their homes, the Project will contribute to further reduction of the concentration at the UTH and to ensuring the expected functions of the Third Level Hospitals.

And indeed great improvements are expected in such fields as child mortality and maternal mortality, among other achievements.

Japan has conducted cooperation in the health sector of Zambia, in such specific fields as maternal and child health, HIV/AIDS, and other infectious diseases, by constructing hospitals and other health facilities and providing medical equipment including to the UTH, as well as technical cooperation including capacity building regarding medical equipment and prevention and treatment of diseases in various ways.

Currently, the grant project amounting to 200 million Yen or around 20 million Kwacha, to provide quality x-ray equipment to a total of 13 hospitals throughout Zambia is also under way.

We believe that for Zambia to continue to achieve further development in a sustainable manner, the strengthening of the health sector is important, among other sectors.

Therefore, the Government of Japan intends to contribute to this process in cooperation with its private sector, in various ways, including promoting further introduction of high quality Japanese medical equipment to Zambia.

In conclusion, I hope that the upgrading the Health Centres to the First level Hospitals, here in Kanyama, and Chawama and Chipata in Lusaka District, will proceed smoothly, to contribute to achieving universal health coverage in Zambia, and to creating “Resilient Zambia”. Thank you.
